| <p>I. BACKGROUND</p> <p>With the growing recognition of WTE technology as a solid waste management option and alternative source of energy, the Department of Energy (DOE) continuously formulates and implements plans and programs to encourage the adoption of WTE facilities in coordination with the Department of Environment and Natural Resources (DENR) consistent with Section 30 of Republic Act No. 9513 otherwise known as the “Renewable Energy Act of 2008”.</p> <p>Accordingly, the government is gearing towards the establishment of a national energy policy and regulatory framework for WTE facilities through legislative measures on the application of WTE technologies with provisions on the classification of WTE as renewable energy technology, roles of DOE, and incentives for availment of operators of WTE facilities.</p> <p>On December 2021, DOE has started implementing a study which is deemed to enhance the effective utilization, promotion and commercialization of WTE technologies in the country. Information generated through the study aims to guide both public and private sectors in the planning and development of appropriate WTE systems. Year 1 implementation of the study has concluded on 30 June 2022 where the following activities, among others, were accomplished:</p> <ul style="list-style-type: none"> • Assessment of the current solid waste streams including management schemes and WTE status / project implementation of the 33 highly urbanized cities (HUCs) and 246 existing sanitary landfill sites (SLFs) and corresponding power potential generation (Annex A); • Evaluation of WTE technologies applicable in the Philippines and determination of most appropriate WTE system for possible adoption (Annex B); and • Possible financing schemes and business models for implementation of WTE projects (Annex C). | |

Hence, the Department seeks to pursue the second year of the study in order to apply the abovementioned outputs towards the realization of WTE technology in the country and further determine the impact of WTE in different aspects.

II. OBJECTIVE OF THE STUDY

The study is deemed to enhance the effective utilization, promotion and commercialization of WTE technologies in the country. Further, information generated by the study aims to guide both public and private sectors in the planning and development of appropriate and cost-effective WTE systems.

Specifically, Year 2 of the study aims to assess the potential of WTE projects in three (3) sites (one each in Luzon, Visayas and Mindanao, wherein one of the three sites is an SLF), and create a manual / guidelines and procedure for WTE project development and implementation from permitting/licensing up to operation.

I. EXPECTED OUTPUTS

The Study (Year 2) is expected to yield the following outputs:

- A. Assessment of the potential development of WTE projects in three (3) sites (one each in Luzon, Visayas and Mindanao, wherein one of the three sites is an existing/operational SLF as monitored by DENR)

Activities

1. Develop procedure for selection, and identification of project sites based on *a)* technical power potential; *b)* topography and surrounding conditions; *c)* implementation of solid waste management programs; and *d)* transmission readiness, among others.
2. Conduct Life-cycle Impact Assessment (LCIA) encompassing the social, economic, health and environmental impacts in developing a WTE project in the selected sites;
3. Validation of municipal solid waste (MSW) available as feedstock and characteristics (e.g. calorific value, recoverability factor, etc.);
4. Determine market options for the sale of energy generation and other possible revenue streams;
5. Determine the following criteria, among others, for the projects to be financially and economically viable:
 - Most appropriate technology to be employed;
 - Optimum power capacity and corresponding investment cost; and
 - Revenue streams (price of electricity; tipping fee range, etc.);
6. Recommendation of possible clustering schemes for LGUs.

- B. Manual / guidelines and procedure for WTE project development and implementation from permitting/licensing/clearances, construction up to operation.

SCOPE OF WORKS

The Study at the minimum shall involve the following:

1. **Data gathering** – actual validation of selected project sites on MSW volume, analysis on characteristics and fuel properties;
2. **Technical / financial / socio-economic analysis and LCIA** – Conduct of necessary scientific methods / analysis in order to achieve the objectives and expected results of the Study; and
3. **Presentation and publication of overall assessment and results of the Study** – establish the terminal report and develop application/software to database the results, and capacity-building workshop on the results of the Study.
