

POWER SUPPLY PROCUREMENT PLAN

CENTRAL NEGROS ELECTRIC COOPERATIVE, INC. (CENECO) POWER SUPPLY PROCUREMENT PLAN

In compliance with the Department of Energy's (DOE) Department Circular No. DC 2018-02-0003, "Adopting and Prescribing the Policy for the Competitive Selection Process in the Procurement by the Distribution Utilities of Power Supply Agreement for the Captive Market" or the Competitive Selection process (CSP) Policy, the Power Supply Procurement Plan (PSPP) Report is hereby created, pursuant to the Section 4 of the said Circular.

The PSPP refers to the DUs' plan for the acquisition of a variety of demand-side and supply-side resources to cost-effectively meet the electricity needs of its customers. The PSPP is an integral part of the Distribution Utilities' Distribution Development Plan (DDP) and must be submitted to the Department of Energy with supported Board Resolution and/or notarized Secretary's Certificate.

The Third-Party Bids and Awards Committee (TPBAC), Joint TPBAC or Third Party Auctioneer (TPA) shall submit to the DOE and in the case of Electric Cooperatives (ECs), through the National Electrification Administration (NEA) the following:

- a. Power Supply Procurement Plan;
- b. Distribution Impact Study/ Load Flow Analysis conducted that served as the basis of the Terms of Reference; and
- c. Due diligence report of the existing generation plant

All Distribution Utilities' shall follow and submit the attached report to the Department of Energy for posting on the DOE CSP Portal. For ECs such reports shall be submitted to DOE and NEA. The NEA shall review the submitted report within ten (10) working days upon receipt prior to its submission to DOE for posting at the DOE CSP Portal.

The content of the PSSP shall be consistent with the DDP. The tables and graph format to be use on the PSPP report is provided on the following sheets. Further, the PSPP shall contain the following sections:

- I. Table of Contents
- II. Introduction
- III. Energy and Demand Forecast (10 year historical and forecast)
- IV. Energy Sales and Purchase
- V. Daily Load Profile and Load Duration Curve
- VI. Existing Contracts & Existing GenCos due diligence report
- VII. DU's Current Supply and Demand
- VIII. Schedule of Power Supply Procurement
- IX. Timeline of the CSP

For inquiries, you may send it at doe.csp@gmail.com or you may contact us through telephone numbers (02) 840-2173 and (02) 479-2900 local 202.

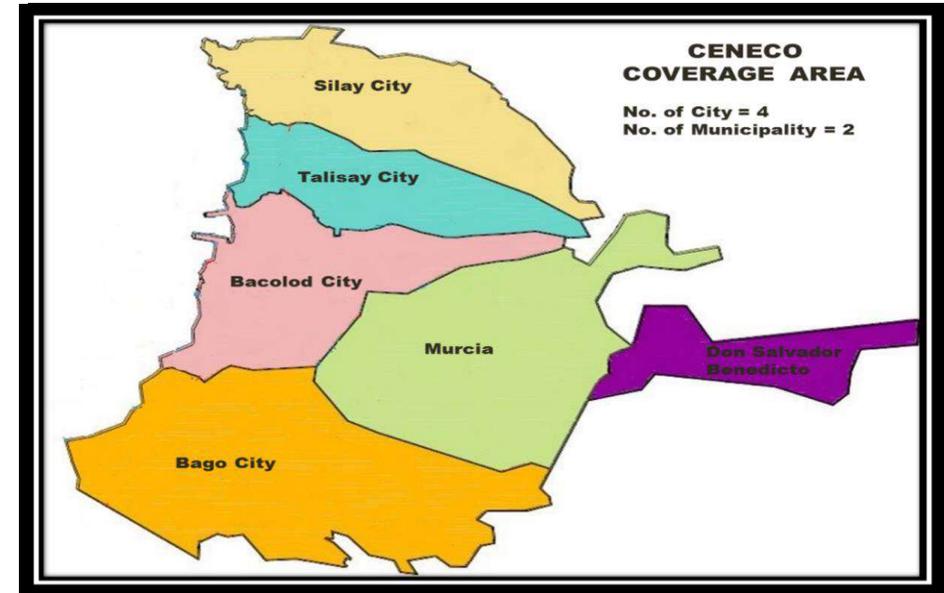

TABLE OF CONTENTS

- I. Introduction
- II. Energy and Demand Forecast (10 year historical and forecast)
- III. Energy Sales and Purchase
- IV. Daily Load Profile and Load Duration Curve
- V. Existing Contracts & Existing GenCos due diligence report
- VI. Distribution Impact Study
- VII. Schedule of Power Supply Procurement
- VII. Timeline of the CSP

I. INTRODUCTION

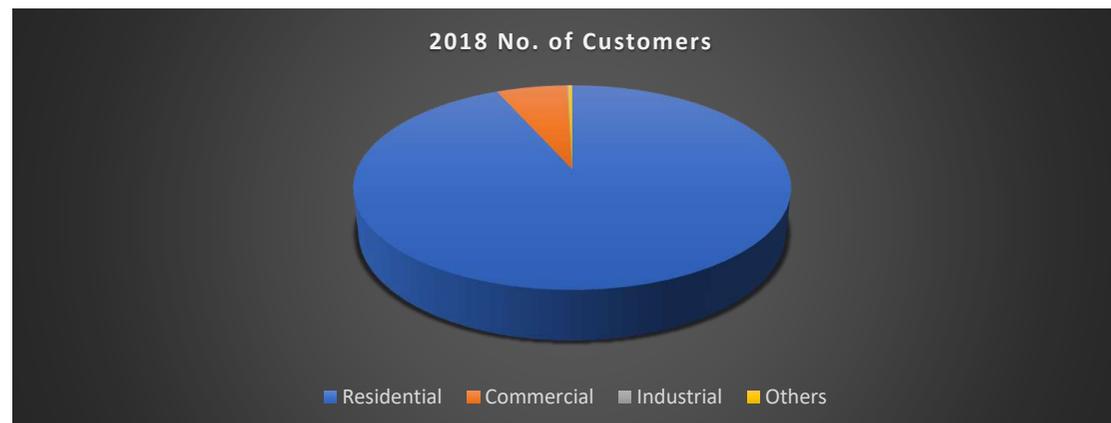

DISTRIBUTION UTILITIES PROFILE

CENECO is one of the 119 electric cooperatives in the Philippines. It was incorporated on February 24, 1975. It is currently serving the cities of Bacolod, Bago, Talisay, Silay and the municipalities of Murcia and Don Salvador Benedicto. As of December, 2018, the total barangays energized is 158 out of 158 or 100%. Total connections served is 231,764 out of 264,300 or 87.69%. The systems loss of CENECO for the year 2018 is 11.12%.

Number of Customer Connections in Franchise	ACTUAL		FORECAST								
	2018	2019	2020	2021	2022	2023	2024	2025	2026	2027	2028
Residential	177,747	184,005	190,473	196,940	203,408	209,875	216,343	222,811	229,278	235,746	242,213
Commercial	11,823	12,239	12,669	13,100	13,530	13,960	14,390	14,820	15,251	15,681	16,111
Industrial	191	198	205	212	219	226	232	239	246	253	260
Others	689	713	738	763	788	814	839	864	889	914	939
Contestable Customers served by RES	8	8	8	8	8	8	8	8	8	8	8
Total (Captive Customers)	190,450	197,155	204,085	211,015	217,945	224,875	231,804	238,734	245,664	252,594	259,524

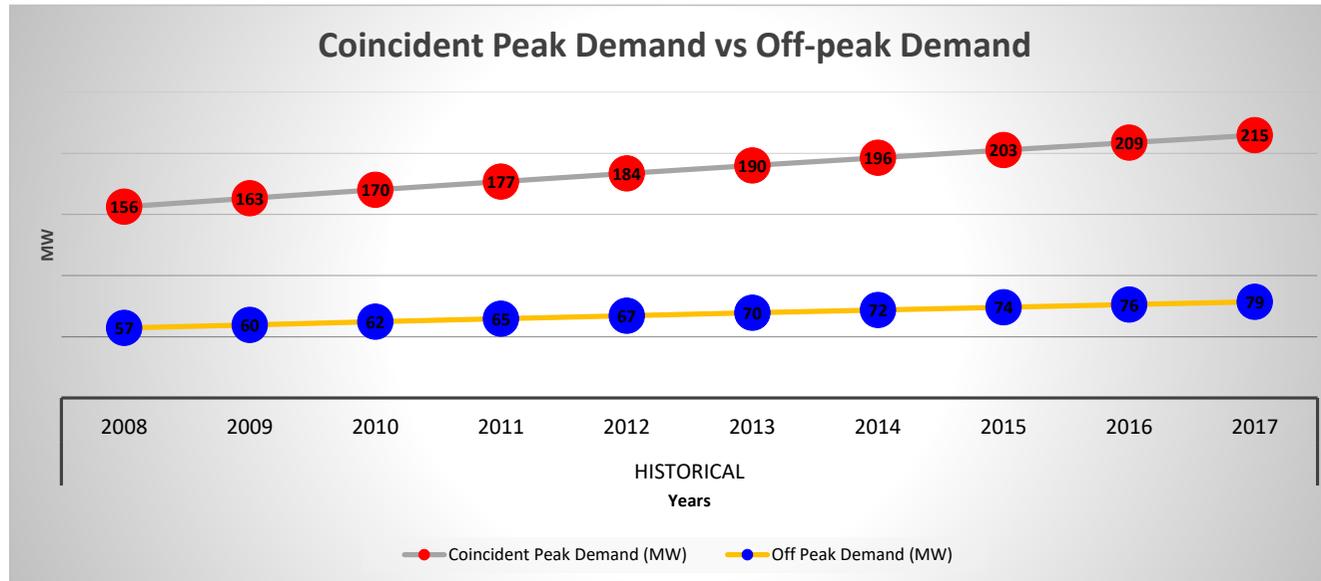

CENECO's consumers has steadily increase by an average of 4.44 % in the last five years, Residential Consumers account for 93.33% of the total consumers' population; Commercial Consumers account for 6.21%; Industrial Consumers account for 0.10%.

II. DEMAND

Demand	HISTORICAL									
	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018
Coincident Peak Demand (MW)	110	113	111	116	124	129	133	141	142	149
Off Peak Demand (MW)				36	44	33	36	40	47	54

Demand	FORECASTED									
	2019	2020	2021	2022	2023	2024	2025	2026	2027	2028
Coincident Peak Demand (MW)	156	163	170	177	184	190	196	203	209	215
Off Peak Demand (MW)	57	60	62	65	67	70	72	74	76	79

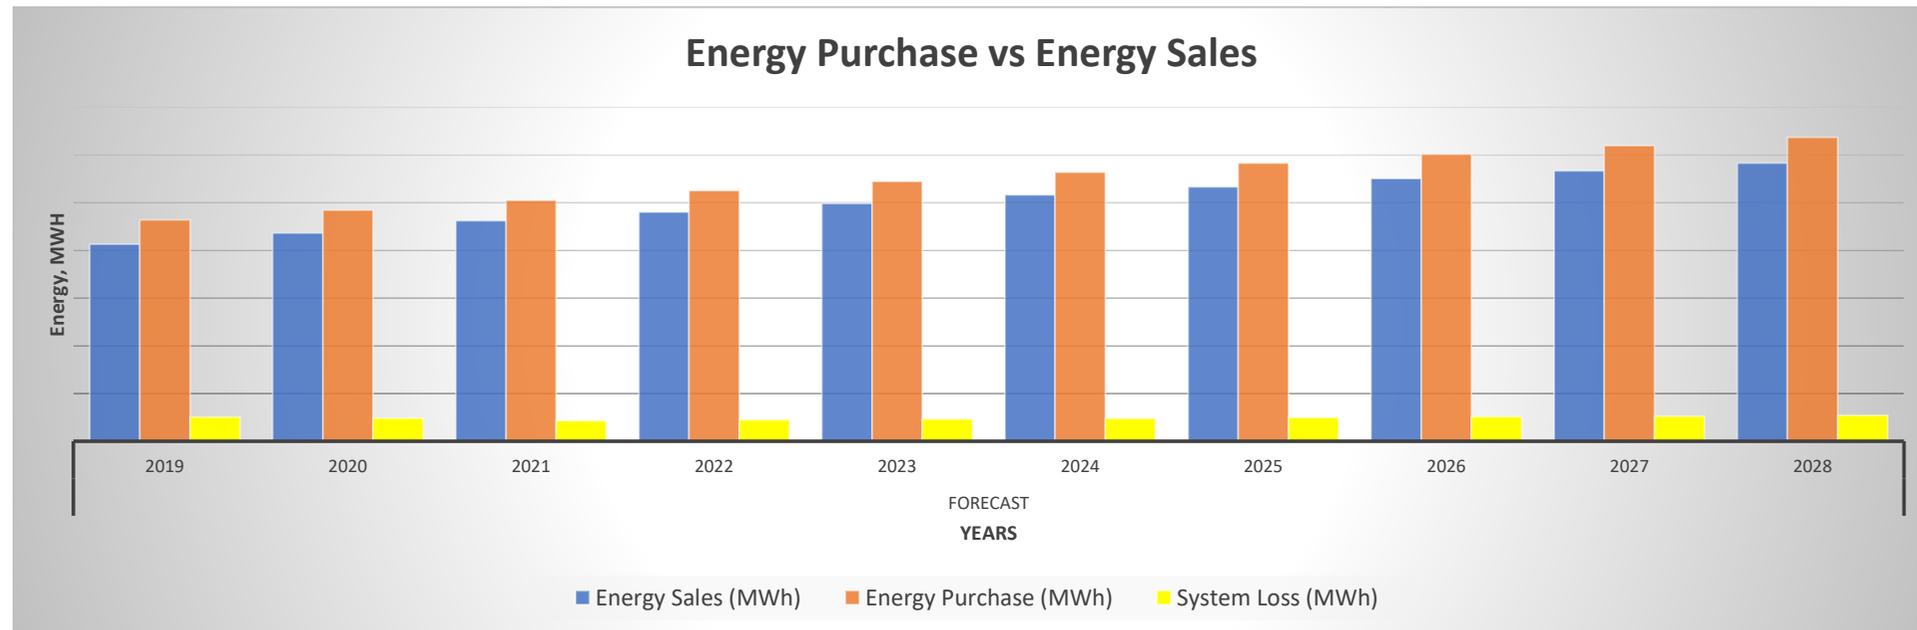

CENECO maximum demand has reached 149 MW in 2018 with an average growth rate of 3.77% in the last five years. Average growth rate of 3.75% in the next ten years 2019 - 2028.

III. ENERGY SALES AND PURCHASE

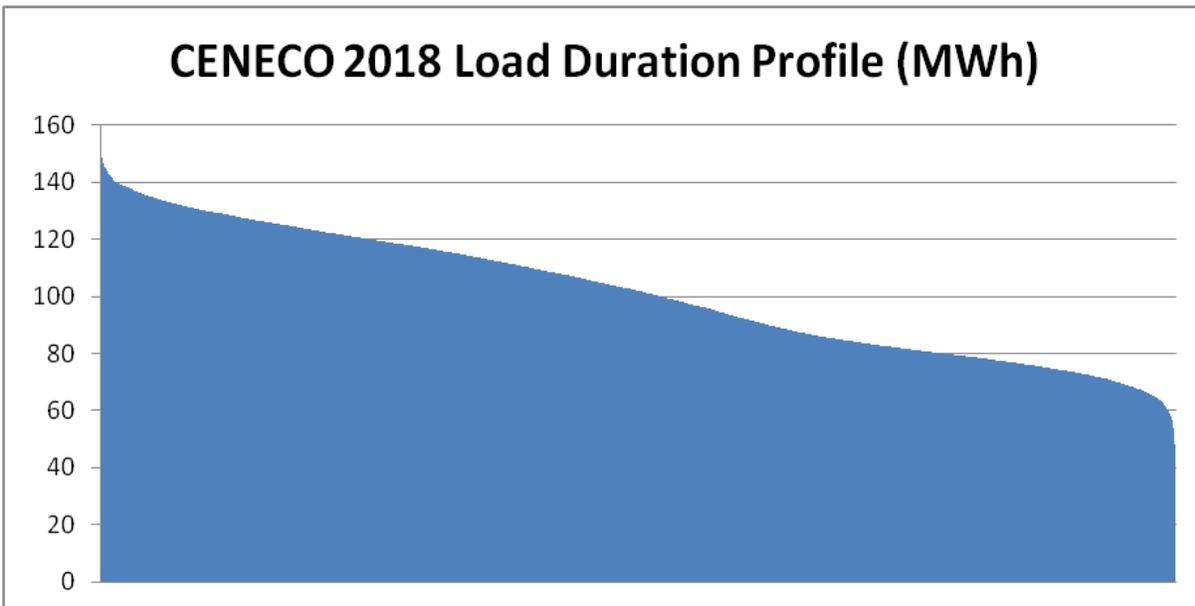

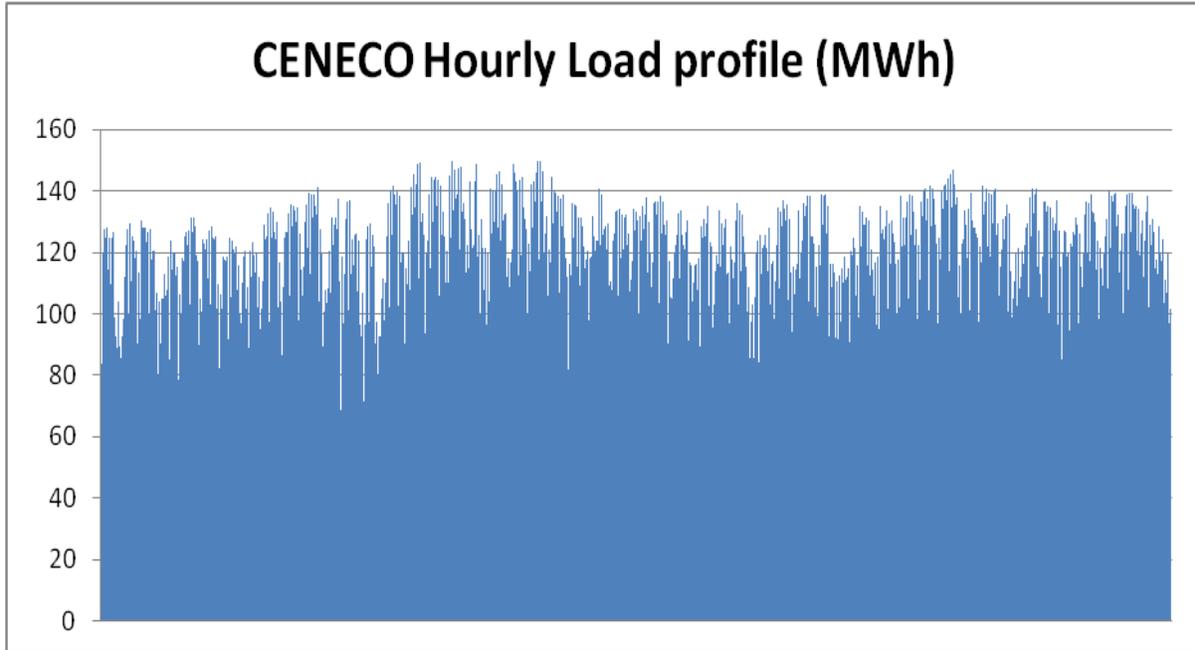

ENERGY SALES AND PURCHASE	HISTORICAL									
	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018
Energy Sales (MWh)	522,020	557,008	555,361	574,459	593,018	608,671	651,589	713,684	749,322	783,316
Energy Purchase (MWh)	582,925	629,690	633,788	654,865	689,068	713,680	749,589	810,805	845,533	881,297
System Loss (MWh)	60,905	72,682	78,427	80,406	96,051	105,009	98,000	97,121	96,211	97,981

ENERGY SALES AND PURCHASE	FORECAST									
	2019	2020	2021	2022	2023	2024	2025	2026	2027	2028
Energy Sales (MWh)	825,755	872,496	924,462	961,177	997,167	1,032,434	1,066,990	1,100,855	1,134,051	1,166,602
Energy Purchase (MWh)	927,814	969,440	1,010,341	1,050,467	1,089,800	1,128,343	1,166,110	1,203,120	1,239,400	1,274,974
System Loss (MWh)	102,060	96,944	85,879	89,290	92,633	95,909	99,119	102,265	105,349	108,373

The average historical growth rate of CENECO sales energy for years 2016-2018 is 5.56% and the average forecasted growth rate for years 2019-2028 is 3.76%.

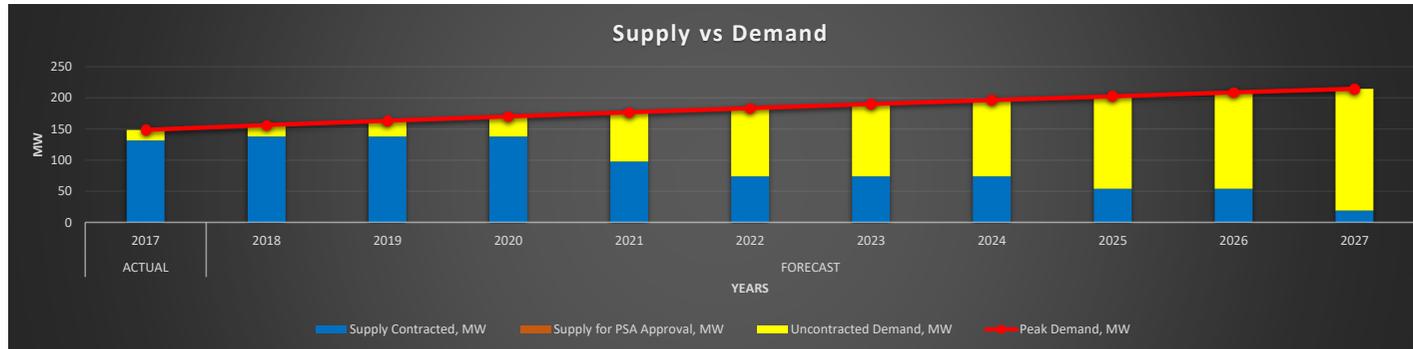

IV. LOAD PROFILE AND LOAD DURATION CURVE

CENECO 2018 annual load profile depicts a baseload of 71 MW with a load factor of 99.47%, a mid-merit load of 48 MW with a load factor of 58.13% and a peaking load of 30 MW with 7.92% load factor.

V. MIXSUPPLY VS DEMAND AND THE OPTIMAL SUPPLY

Supply Demand	ACTUAL	FORECAST									
	2018	2019	2020	2021	2022	2023	2024	2025	2026	2027	2028

PCPC	PCPC		02/17	02/31	35	Actual. LF	Base/Mid-merit	Grid-Connected	IPP	Active	Coal	125	100
Energreen	Energreen		05/16	05/31	18.9	78,000	Mid-merit/Peaking	Grid-Connected	IPP	Active	Diesel	23	19.4

In anticipation of the privatization of NPC/PSALM's generating assets, the former sole supplier of electricity in Visayas Grid, and their continuous reduction of contract capacity in their Transition Supply Agreement, CENECO entered into its first contract with an IPP KSPC for a capacity of 40 MW. KSPC Plant started its commercial operation in February of 2011 at the time Wholesale Electricity Spot Market (WESM) in Visayas has just begun in December 26, 2010. Further reduction of NPC/PSALM's contract capacity prompted another contract at 24 MW additional capacity from KSPC and an initial 10 MW capacity from GCGI with additional provision of 10 MW at the beginning of 2nd contract year in December 26, 2012. FDCUI's 20 MW was transitory while waiting for PCPC's 35 MW delivery on June 26, 2016. To further secure the high growth rate of CENECO's load requirement, it entered into contract with Energreen a capacity of 18.9 MW for peaking and reserve which delivered 12.6 MW on May 26, 2016 and completed 18.9 MW last May of 2017. CENECO has reached the highest and unprecedented monthly energy consumption of 78 Million kWh and demand of 152MW last billing period of April 2018. CENECO base load level is at 74MW, mid-merit load level of 51 MW at 55% load factor and peak load of 25 MW at 25% load factor.

VI. DISTRIBUTION IMPACT STUDY

CENECO evaluated the capacity requirement of substations, sub transmission lines and distribution transformers and determined the year that the loading criteria of equipment are violated. The demand and location of new and future customers were also anticipated, especially bulk or spot loads.

Reclamation, Lopez, Burgos, Mt. View, Talisay, Alijis, Gonzaga, and Panaogao substations already reached the 70% loading limit. Projects that will address these overloading are included in CENECO CAPEX 2014-2019 application. There will be upgrading of Burgos, Talisay, and Panaogao substations. New substations (Cyber Center, Capitol) will also be constructed to accommodate spot loads. Construction of new NGCP-Silay 69 kV line will also address the sub transmission overload problem.

CENECO calculated and evaluated the available short circuit currents in the distribution system using Synergi Electric software. Then, CENECO also assessed the short circuit duties of the protective devices against maximum faults and their adequacy to sense minimum faults. All devices have adequate protection.

Assessed of distribution poles shows that there are rotten poles that need replacement. The evaluation of sub transmission poles shows that there are poles that need to be replaced as well and others need to be relocated. There are areas where distribution lines need rehabilitation because of DPWH road widening projects.

CENECO calculated the voltages at the load points of the Medium Voltage (MV) Feeders for the base year and forecasted years and evaluated the power quality of distribution system. For purposes of Distribution Planning, power quality assessment shall include the under/over voltages and unbalance voltages in primary distribution feeders. Upgrading of conductors and placement of capacitors were implemented in areas with low voltages.

According to Electric Cooperatives Distribution Utility Planning Manual, "In the interim the reliability criterion for sub transmission system is single outage contingency or (N-1) redundancy and for the distribution system, the maximum System Average Interruption Frequency Index (SAIFI) and System Average Interruption Duration Index (SAIDI) are set at maximum 20 customer-interruptions per customer-year and 45 hours per customer-year, respectively. CENECO is compliant in this regard.

The system loss of CENECO is also below the cap limit set by ERC.

VII. SCHEDULE OF POWER SUPPLY PROCUREMENT

Base / mid-merit / peaking	For CSP		Proposed contract period		Proposed schedule (MM/YYYY)						
	Demand (MW)	Energy (MWh)	Start Month and Year	End Month and Year	Publication of Invitation to Bid	Pre-bid Conference	Submission and Opening of Bids	Bid Evaluation	Awarding	PSA Signing	Joint Application to ERC
