Note:
Excluding off-grid generators
Released as of 31 March 2025
Includes FIT Approved Plants based on RE Projects under FIT System as of 31 March 2025
Installed Capacity - nameplate capacity; full-load continuous gross capacity of a unit under specified conditions, as calculated from the electric generator nameplate based on the rated power factor.
Dependable Capacity - maximum capacity when modified for ambient limitations for a specified period of time, such as a month or a season.
Installed and Dependable Capacity values may be updated as necessary.
For Solar Power Plants: Installed Capacity are MWP or MWDC values while Dependable Capacity are MWAC values
- For Self Generating Plants with asterisk (), no recorded installed capacity thus presented values are assumption from the declared dependable capacity divide by 0.8
- For Self Generating Plants with double asterisk (), no recorded dependable capacity thus presented values are assumption from the installed capacity multiplied by 0.8
