Note:

Excluding off-grid generators

Released as of 31 March 2025

Includes FIT Approved Plants based on RE Projects under FIT System as of 31 March 2025

Installed Capacity - nameplate capacity: full-load continuous gross capacity of a unit under specified conditions, as calculated from the electric generator nameplate based on the rated power factor.

Dependable Capacity - maximum capacity when modified for ambient limitations for a specified period of time, such as a month or a season.

Installed and Dependable Capacity values may be updated as necessary.
